

DIESEL JAZZTINE G. ALOBA

Licensed Electrical Engineer

+63 906 473 0737 | dieselaloba.github.io | alobadiesel@gmail.com | linkedin.com/in/dieseljazztinealoba

SUMMARY

Licensed Electrical Engineer specializing in renewable energy systems, electrical design, and industrial automation. Experienced in photovoltaic system design, commissioning, technical analysis, and engineering process development across residential, commercial, and industrial applications. Proven ability to bridge engineering design, field execution, and systems optimization through development of computation tools, standardized technical documentation, and workflow automation systems. Proficient in CAD design, simulation software, PLC systems, and solar energy technologies with strong experience in technical presentations, product evaluation, and multidisciplinary project coordination.

EDUCATION

Pamantasan ng Lungsod ng Maynila, 2018 - 2023

BS in Electrical Engineering

Intramuros, Manila

Graduation Date: September 2023

PROFESSIONAL CERTIFICATION

Registered Electrical Engineer, 2024

Philippine Regulatory Commission

Morayta, Manila

Induction Date: June 2024

PROFESSIONAL EXPERIENCE

Sr. Technical Engineer , WeGen Energy Philippines Inc. (November 2023 – Present)

Site Engineering & Project Execution

- Supervise solar PV installation activities from construction through commissioning and project turnover.
- Ensure compliance with engineering standards, safety regulations, and project specifications.
- Support troubleshooting, maintenance, and operational optimization of installed systems.

Design Engineering

- Designed grid-tied and hybrid PV systems for residential, commercial, and large industrial projects with a combined capacity of 18.05MWp.
- Performed electrical calculations and system sizing for solar installations.
- Developed standardized CAD templates for Single Line Diagrams (SLD), grounding layouts, and mounting system drawings.
- Developed computational tools for Voltage Drop Analysis (VDA) and Short Circuit Analysis (SCA) improving design validation efficiency.

Research & Development

- Led technical evaluation of emerging technologies including inverters, microinverters, optimizers, and Battery Energy Storage Systems (BESS).
- Conducted product analysis and benchmarking for deployment suitability.
- Developed technical solution packages aligned with target customer demographics.
- Created a departmental tracking system for a universal project database, implementing automated tagging and project generation to improve data organization and workflow efficiency.

Technical Representation

- Serve as company technical spokesperson during proposal presentations and executive discussions.
- Translate complex engineering concepts into clear technical recommendations for clients and stakeholders.

Sustainability & Training

- Developed presentations, interactive demonstrations, and learning materials supporting community development initiatives aligned with sustainability goals.
- Supervise OJT trainees from local and international institutions, providing mentorship and technical guidance.

Systems Engineer , Avant Equinox Group Industry Solution (August - December 2023)

Supported automation and industrial control system projects across geothermal and cement production facilities.

- **Commissioning Engineer, Philippine Geothermal Production Company - Tiwi, Albay** (October - December 2023)
Brine Facility Project: Automation and Provision of System for new facility
- **CEMAT and Simulation, Eagle Cement Corporation - San Ildefonso Plant** (September 2023)
Packhouse PCS Upgrade: Packhouse program upgrade from S7300 and integration to existing virtualized PCS

Intern, Econtract Co. (July - August 2021)

- Developed an electrical materials estimation program with automated quotation functionality.
- Conducted Short Circuit Analysis (SCA) calculations for industrial electrical systems.
- Developed Excel VBA macro tools for Voltage Drop Analysis (VDA) and Short Circuit Analysis (SCA) with automated load schedule output generation.
- Participated in Megger Asia electrical testing training programs.

AFFILIATIONS

PLM Junior Institute of Electrical Engineers (PLM JIEE) (August 2018 - August 2023)

Technical Committee Head

- Responsible for the execution of all video conference hosted by PLM JIEE, including webinars, seminars and productions
- Coordinated with engineers and other experts that served as speakers regarding Philippine Electrical Code
- Managed Zoom and FB Live broadcast during multiple webinars held by the PLM JIEE from 2020-2022

Department of Science and Technology - Science Education Institute (DOST-SEI) (2018 - 2023)

- *Merit Scholar*, Awarded DOST Scholarship and benefit from its services and programs
- Participated in various seminars and conferences held by DOST-SEI to aid its scholars in their studies and careers

APPLICATION EXPERTISE & SKILLS

Engineering Software:

- AutoCAD/Revit
- SketchUp
- DIALux Evo
- PVSOL & PVSyst
- MATLAB
- NI Multisim

Automation & Control:

- Siemens PCS7
- SIMATIC
- TIA Portal
- STEP7 MicroWIN
- WinCC SCADA

Programming & Systems Development:

- Excel VBA
- Arduino Programming

Additional Tools:

- VMware
- OBS & vMix

Core Skills:

- Engineering Design & Analysis
- Technical Communication
- Project Supervision
- Systems Optimization
- Leadership & Training
- Complex Problem Solving

CERTIFICATIONS

- **Working at Heights, Tower Climbing, Rope Rescue and Rigging (2025)**
- **Enphase IQ8P Installer Certification (2024)**
- **Huawei FusionSolar Installer Certification (2024)**
- **Deye Advanced Inverter Training (2024)**
- **CEMAT Training – Holcim Standard (2023)**
- **Megger Asia Electrical Testing Series (2021)**
- **IIEE Technical Conferences & Energy Seminars**
